

**PRONUCLEAR DNA INJECTION FORM (External)**

**Date:**

**Investigator Name:**

**Lab/Institute:**

**Project Name (Short; as it will appear on cage cards):**

**Type of Vector:**      BAC                  Plasmid

**DNA Fragment Length:**

**Method of DNA Purification (e.g. Nucleobond Column for BAC DNA):**

**DNA concentration:**

*NOTE:* DNA should be dissolved in TE pH 7.5 and maintained at 4°C

Please provide 5-20 ul aliquot (depending on concentration) per injection day

**Expected phenotype or lethality?**

If yes, please provide details:

**Desired Mouse Strain:**

**Number of days requested for injection:**

**Please Attach:**

- A photo of the purified DNA fragment
- Examples of results from PCR and/or Southern analysis to identify founders

**PI's Signature:**
